

Klever Desk™ Laminate Panels

Product Specification

Klever desks are made using New Zealand-made board and delivered to you in 100% recyclable packaging. Klever surfaces offer you the perfect solution for creating exceptional interior spaces. We're inspired by international trends and local lifestyles so you can trust that our highly durable, low maintenance and easy to clean range of decorative panels are the ideal choice.

Klever Desk™ Laminate Panels

Top & Edge Colour Swatches:

Overview

- Klever Desk Laminate Board is a tough melamine surface laminated to medium density fibreboard (MDF) that provides a double faced, pre-finished decorative panel.
- NZ Made Snowdrift White Melteca, Classic Oak Naturale Melteca & Silver Strata Naturale Melteca by Laminex®. Proprietary board for Klever Oak & Black.
- Commercial-grade 25mm tops, with scallop and finished in melamine with 2mm PVC edge.
- Our worktops are made using New Zealand-made Laminex® board, and arrive to you in NZ made recyclable packaging.

Composition

- Sheets of melamine impregnated overlay are bonded to both sides of the medium density fibreboard substrate under heat and pressure. The resin on the top surface of the overlay cures, forming a tough, stain resistant finish.

Fastening

- Always use screws specifically designed for use with medium density fibre board or particle board e.g. Twinfast-screws or Super-screws. Drill a pilot hole slightly beyond the full depth of the screw penetration. Do not over-tighten screws.
- To avoid surface lifting, screws must not penetrate more than two thirds of panel thickness, e.g. 16mm panel = 10.5mm maximum penetration.

Care & Cleaning

- Regular cleaning requires only a wipe down with warm soapy water, follow up with dry cloth. The use of streak-free glass cleaner and a soft cloth can also maintain the surface.
- **NEVER USE ANY OF THE FOLLOWING ON MELTECA FOR ANY REASON:** Abrasive cleaners, such as: Jif, Vim, Chemico, Brasso, Mr Muscle cleaner, Neat Jonola, Wire wool, Scourer pads, Sand paper
- **Stubborn marks or stains:** Clean with Ajax spray and wipe; a soft nylon nail brush will assist if dirt particles prove hard to move.
- **Smearing, fingermarks, marking from cold or hot dishes, stickiness:** Apply 1 or 2 applications of acetone (from pharmacy), then wipe with warm soapy water and wipe over with dry cloth.
- **Newsprint:** Methylated spirits or mineral turpentine then wipe with warm soapy water and wipe dry.
- **Pencil:** Water and cloth.
- **Felt pen or dry marker:** Methylated spirits or acetone, then wipe with warm soapy water and wipe dry.
- **Paint:** Acetone or duco lacquer thinners (from paint shop), then wipe with warm soapy water and wipe dry.
- **Glue - contact type:** Ados solvent PS (from paint shop), then wipe with warm soapy water and wipe dry.
